

The Wild West Community Guidelines

This set of Community Guidelines outlines what is and isn't acceptable within our community and our experience on the Roblox platform. These policies apply to all types of content within our community, including text chat messages to images and videos shared on our social media.

Our policies aim to ensure a safe and welcoming environment for all to engage in. We have a zero-tolerance policy for abuse towards our community and our employees, contractors, and volunteers.

Below you will see a list of policies that apply to you while participating within our community, either directly on our social media platforms or within our experience on the Roblox platform.

Roblox's Terms of Use

We're an indie game development studio based on the Roblox platform; your use of Roblox is governed by [Roblox's Terms of Use](#) and [Community Standards](#).

We expect all our players to follow the spirit of Roblox's Community Standards when interacting with other community members, both on and off the Roblox platform.

Treat Others How You Want to Be Treated

- **Do not threaten to harm others:** We do not tolerate any behavior that directly endangers another person. This includes threatening violence or harm, sharing personally identifiable information of another person (aka "doxxing"), and blackmail/extortion.
- **Do not encourage or participate in hateful conduct/hate speech:** This includes attacking another person or group of people based on characteristics such as their race, ethnicity, caste, national origin, sex, gender identity, gender presentation, sexual orientation, religious affiliation, age, serious illness, disabilities, or other legally protected classifications.
- **Do not encourage or promote self-harm/injury:** We take the well-being of our community very seriously. It's unacceptable to share content or behavior that encourages, promotes, or depicts self-harm or self-injury.

If you require resources on self-harm prevention, see: <https://suicidepreventionlifeline.org/>

- **Do not harass others, encourage or participate in harassment:** This includes stalking, trolling, intimidation, or other forms of harassment. We do not allow any content that promotes this type of behavior.
- **Do not share or encourage adult content or actions:** We have a zero-tolerance policy for any sexually explicit content.
- **Do not encourage or support violent extremism:** This includes promoting violent events, extremist media, or similar behavior.

Honesty is Everything

- **Do not share misleading information:** This includes any content that can significantly risk physical or societal harm (i.e., misleading medical information, false news information on world events). We may remove content if we reasonably believe the information is incorrect and could result in harm.
- **Do not share cheating or hacking tools:** Everyone should play fair by the rules; we reserve the right to remove any content that encourages or demonstrates cheating, exploiting or hacking.

Third-Party Software

As stated within [Roblox's Terms of Use](#) and [Community Standards](#), any third-party software intended to be used for cheating, exploiting, debugging, reverse engineering, or botting is strictly prohibited.

Those who create and develop cheating software do not care if you're banned for using their product; they may lie to you and say that their service is undetectable and won't get you banned. This is not true; it's not worth the risk.

If you have any doubts that something you're considering using could be considered in violation of these guidelines, we strongly advise you not to use it.

There are exceptions to this policy; those exceptions are:

- Software used to unlock Roblox's default 60 FPS limit; use this and nothing else:
<https://github.com/axstin/rbxfpsunlocker/releases>
- Custom Roblox shaders; use this and nothing else:
https://roblox.fandom.com/wiki/Roblox_shaders

Real World Trading & Scamming

- **Do not sell or buy in-game items, services, or currency for real-world currency:** People who sell in-game items and currency often obtain them by:
 - Gaining unauthorized access to players' accounts (aka "hacking") and taking their items.
 - Using cheats, exploits, or macros. Often known as "botting."

This type of behavior is against our guidelines and Roblox's Terms of Use. Real-world trading may also risk your privacy; your payment information may be shared without your consent by the seller.

- **Do not obtain items or currency from players by scamming them:** It's unacceptable to trick or deceive other players for your own advantage.

Using Multiple Accounts

You're allowed to create as many accounts as you'd like, and you are welcome to trade items and wealth between your accounts as you would another player; however, this is done entirely at your own risk.

We strongly advise using the officially provided trading systems. Unusual trading methods are risky, and we do not encourage these methods.

Your created accounts are not allowed to interact with each other to gain an unfair advantage within our experience. This includes farming wealth, performing illegitimate or otherwise fraudulent trades with other players, or simultaneously controlling more than two accounts.

The Golden Rule

Treat others how you would like to be treated.

Please take these policies seriously; do not search for loopholes or attempt to lawyer your way around the guidelines. Understand them and respect the spirit in which they were created.

Remember that we encourage you to exercise common sense as these guidelines won't necessarily cover every possible situation.

If you see any content or behavior that violates these guidelines or Roblox's Terms of Use and Community Standards, please report it directly to our moderators and administrators via our social media platforms.

These guidelines may be updated over time as we encounter new situations not covered in our current version of these guidelines. Moderators reserve the right to take action against a user or content that violates the spirit of these guidelines at any time, for any reason.
